Ibis Tek, Inc. in Good Standing Following Ownership and Management Transition

Pittsburgh, PA, May 31, 2017 – In response to recent news about former officers, directors and owners of Ibis Tek LLC formally submitting guilty pleas to fraud charges, the new owners and leadership team of Ibis Tek, Inc. confirm the company’s good standing.

As part of a Department of Justice (DoJ) settlement regarding fraud charges related to former company officers and activities dating back to 2009, Ibis Tek was sold to its new ownership team in early 2017. The former owners who were involved in today’s legal proceedings have not been associated with the company since January 1, 2017, when new leadership was installed.

The DoJ and Department of Defense (DoD) have since cleared the company to be held harmless and continue to do business with the DoD and other government entities.

“The formers owners are being held accountable for their transgressions from years ago, and the new owners and management team, along with its 250 western PA workforce, remain focused on growing the business and serving our men and woman in uniform,” said Vince Nardy, CEO of Ibis Tek, Inc.

###
